DASHBOARD · HOME PAGE

Reading the Dashboard

The Dashboard is the first page you land on after login. Every number on it is live and clickable — hover a card for a breakdown, click it to open the exact list of records behind that number, already filtered to match.

01 · ALWAYS VISIBLE

Filters & header

Three dropdowns sit top-right of the Dashboard. They narrow every section below at once — nothing needs re-filtering section by section.

That left-to-right order matters: choosing a **Company** resets Product and shrinks the Product list to that company's own products. Choosing a **BDE** shrinks Product further, to only the products that BDE is mapped to. If a change makes your current selection no longer valid, that field clears itself rather than silently keeping a stale filter.

A **Reset** link appears next to the dropdowns as soon as any filter is active, clearing all three in one click.

Note — The BDE dropdown only appears for a CEO or Sales Manager. A Sales Person never sees it — their view is already scoped to their own records, so there's nothing left to narrow.

Sales Performance

Three tiles summarising target vs. achievement for the current fiscal year, aggregated across every product you're mapped to. Click any tile to open the full Sales Dashboard; hover one for a per-BDE breakdown, ranked highest first.

SALES TARGET TO DATE

This year's target, prorated to today.

SALES ACTUAL TO DATE

What's been booked so far, with % achieved.

SALES LICENSES

Licenses closed vs. target, with % achieved.

This section only appears if you have access to the Sales (SEAL) Dashboard — if you don't see it, that access hasn't been granted to you.

03 · TWO COLUMNS, ONE ROW

Call Activities & Lead Pipeline Overview

On the left, calls still waiting on a follow-up. On the right, where every lead in the pipeline currently sits. The chevron on either column collapses both — they act as one unit.

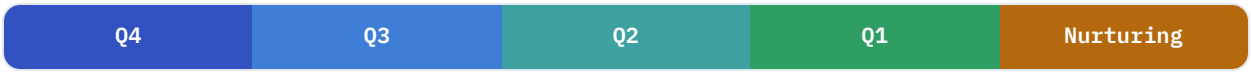

Call Activities

CARD	COUNTS	OPENS
Calls Made Today	Calls logged today, across the board.	`Call Tracker`
Today Pending Calls	Follow-up due today, not yet moved to pipeline.	`Call Tracker · today`
Last Week Pending	Follow-up was due last week, still pending.	`Call Tracker · last week`
This Week Pending	Follow-up due sometime this week.	`Call Tracker · this week`
Next Week Calls	Follow-up scheduled for next week.	`Call Tracker · next week`
Overdue Calls `alert`	Follow-up date has passed, no cutoff — however old.	`Call Tracker · overdue`

Lead Pipeline Overview

Pipeline Breakdown

Every active lead, split by quadrant — Q4 is newest/coolest, Q1 is hottest/closest to close. Nurturing sits outside the active pipeline and is shown apart.

Click any quadrant to open the Lead Report already filtered to it.

Requalification Breakdown

Leads that auto-degraded a quadrant from sitting untouched too long, split the same way. Empty when nothing currently needs requalification.

04 · TWO COLUMNS, ONE ROW

Sales Activities & Cash Flow Activities

Left: leads with engagement activity due or overdue. Right: collections and POAs due or overdue. Both collapse together.

Sales Activities

CARD	WINDOW	OPENS
Today's Lead Activities	Engagement due today.	Lead Report
Last Week's Lead Activities	Engagement due last week.	Lead Report
This Week's Lead Activities	Engagement due this week.	Lead Report
This Month's Lead Activities	Engagement due this month.	Lead Report
Next Month's Lead Activities	Engagement due next month.	Lead Report
Over Due Activities alert	Engagement date passed, last log not marked Complete.	Lead Report

All six exclude leads already at Order Won or Order Lost — those are done, not pending.

Cash Flow Activities

CARD	COUNTS	OPENS
Cash Flow Due Today	Collection due today (Revised EDC if set, else EDC), not fully paid.	Cash Flow Tracker
POA Due Today	POA due today, status not Completed.	Cash Flow Tracker
Expired EDC Milestones alert	Collection date has passed, still not fully paid.	Cash Flow Tracker
Overdue POA Activities alert	POA date has passed, status not Completed.	Cash Flow Tracker

This section only shows if you have Cash Flow Report access — every card opens the editable Tracker, not the read-only Report, so you can update the record right there. Clicking one record inside a card's hover list jumps straight to that single milestone, highlighted.

05 · BOTTOM OF PAGE

Quadrant charts

Two rows of pie charts, both split by the same Q4–Q1 / Nurturing quadrants and colours, sliced two different ways.

PRODUCT-WISE QUADRANT COUNT

One pie per product. Shows where each product's leads sit in the pipeline. Click a slice to open the Lead Report filtered to that quadrant.

OPPORTUNITY VALUE-WISE QUADRANT COUNT

One pie per deal-size range. Hover a slice for the product breakdown inside that range and quadrant.

06 · REFERENCE

Who sees what

The Dashboard shows different scope depending on your role — the same scoping the rest of the CRM uses.

ROLE	DEFAULT SCOPE	BDE FILTER
Sales Person	Own records only.	Not shown — nothing to narrow.
Sales Manager	Self + everyone reporting up to them, at every level down.	Narrows to one person on their team.
CEO	Everyone, company-wide.	Narrows to any one BDE.

Company and Product filters work the same way for every role — they only ever narrow your own scope further, never widen it. The Sales Performance and Cash Flow Activities sections each depend on a separate access grant, so two people with the same role can still see a different set of sections.

Tips

Hover most cards show a short breakdown before you click — lead/customer name, product, owner, and the date that made it count.

Click a card's number and a card's hover-list row take you to different places: the number opens the full filtered list, a specific row jumps straight to that one record.

Collapse every section has a chevron on its heading to hide the body when you only need the numbers at a glance. Your collapsed/expanded state is remembered on this device the next time you open the Dashboard.
